

# Summary of the Phytoremediation State of the Science Conference

Boston, Massachusetts  
May 1-2, 2000

# **Summary of the Phytoremediation State of the Science Conference**

Boston, Massachusetts  
May 1-2, 2000

United States Environmental Protection Agency  
Office of Research and Development  
National Risk Management Research Laboratory  
Cincinnati, OH

## **NOTICE**

The U.S. Environmental Protection Agency through its Office of Research and Development funded and managed the research described here under Contract 68-D7-0001 to Eastern Research Group. It has been subjected to Agency review and approved for publication. Mention of trade names or commercial products does not constitute endorsement or recommendation for use.

## **FOREWORD**

The U.S. Environmental Protection Agency is charged by Congress with protecting the Nation's land, air, and water resources. Under a mandate of national environmental laws, the Agency strives to formulate and implement actions leading to a compatible balance between human activities and the ability of natural systems to support and nurture life. To meet this mandate, EPA's research program is providing data and technical support for solving environmental problems today and building a science knowledge base necessary to manage our ecological resources wisely, understand how pollutants affect our health, and prevent or reduce environmental risks in the future.

The National Risk Management Research Laboratory (NRMRL) is the Agency's center for investigation of technological and management approaches for preventing and reducing risks from pollution that threaten human health and the environment. The focus of the Laboratory's research program is on methods and their cost-effectiveness for prevention and control of pollution to air, land, water, and subsurface resources; protection of water quality in public water systems; remediation of contaminated sites, sediments and ground water; prevention and control of indoor air pollution; and restoration of ecosystems. NRMRL collaborates with both public and private sector partners to foster technologies that reduce the cost of compliance and to anticipate emerging problems. NRMRL's research provides solutions to environmental problems by: developing and promoting technologies that protect and improve the environment; advancing scientific and engineering information to support regulatory and policy decisions; and providing the technical support and information transfer to ensure implementation of environmental regulations and strategies at the national, state, and community levels.

This publication has been produced as part of the Laboratory's strategic long-term research plan. It is published and made available by EPA's Office of Research and Development to assist the user community and to link researchers with their clients.

E. Timothy Oppelt, Director  
National Risk Management Research Laboratory

## **ACKNOWLEDGEMENTS**

Many people participated in planning and organizing the Phytoremediation: State of the Science Conference which was held May 1-2, 2000. The primary contributors for the conference are listed below:

Steven Rock, U.S. Environmental Protection Agency (U.S. EPA), National Risk Management Research Laboratory (NRMRL), Cincinnati, OH

Steven McCutcheon, U.S. EPA, National Exposure Research Laboratory (NERL), Athens, GA

Norman Kulujian, U.S. EPA, Office of Research and Development (ORD), Philadelphia, PA

Joan Colson, U.S. EPA, NRMRL, Cincinnati, OH

Mitch Lasat, U.S. EPA, Office of Solid Waste and Emergency Response (OSWER), Washington, DC

Steven Hirsch, U.S. EPA Region 3, Philadelphia, PA

Judy Canova, Bureau of Land and Waste Management, South Carolina Department of Health and Environmental Control

Jeff Heimerman, U.S. EPA, OSWER, Washington, DC

Linda Fiedler, U.S. EPA, OSWER, Washington, DC

The success of the conference and the preparation of this document are also due to the efforts of the many speakers and poster presenters.

Eastern Research Group provided logistical support both in advance of and during the conference as well as for the development of this document under Contract 68-D7-0001.

## CONTENTS

Notice .....	ii
Foreword .....	iii
Acknowledgments .....	iv

### Session I: Introduction and Plenary

Welcome and Introductions .....	1
Norm Kulujian	
EPA Policy Overview .....	1
Stephen Luftig	
The Science and Practice of Phytoremediation .....	3
Steven McCutcheon	
Interstate Technical Regulatory Cooperation (ITRC): Making it Easier for Regulators ...	4
Robert Mueller	
International Perspective on the Cleanup of Metals and Other Contaminants .....	6
Terry McIntyre	
Looking Forward on Phytotechnologies .....	7
Steven Rock	
Speaker Panel and Audience Discussion .....	8

### Session II: Fundamental Processes of Plants and Soils

Transport of Contaminants in Plant and Soil Systems .....	9
Larry Erickson	
Enzymatic Processes Used by Plants to Degrade Organic Compounds .....	10
Nelson Lee Wolfe	
Biosystem Treatment of Recalcitrant Soil Contaminants .....	11
John Fletcher	

Speaker Panel and Audience Discussion .....	12
---	----

### Session IIIA: Brownfields Applications and Beneficial Use Of Land

Goals for Brownfields Pilots .....	13
John Podgurski	
Hartford Brownfields Site: Site Description and Summary of Phytoremediation Project .....	14
Jeanne Webb	
Hartford Brownfields Site: Public Health Perspective .....	15
Jennifer Kertanis	
Integrating Remediation into Landscape Design .....	16
Niall Kirkwood	
Speaker Panel and Audience Discussion .....	17

### Session IIIB: Radionuclides

Summary of DOE Projects and Recommendations Offered at a Recent DOE Workshop .....	18
Scott McMullin	
Capturing a “Mixed” Contaminant Plume: Tritium Phytoevaporation at Argonne National Laboratory-East .....	19
M. Cristina Negri	
Phytoremediation Application for Radionuclide Removal at Argonne National Laboratory-West .....	20
Scott Lee	
Speaker Panel and Audience Discussion .....	21

### Session IVA: The Fate of Chlorinated Solvents that Disappear from Planted Systems

Phytoremediation of Solvents .....	22
Milton Gordon	
The Case for Phytovolatilization .....	23
William Doucette	

Phytotransformation Pathways and Mass Balance for Chlorinated Alkanes and Alkenes . . . . .	25
Valentine Nzengung	

Speaker Panel and Audience Discussion . . . . .	27
---	----

#### Session IVB: Innovative Solutions for Metals Removal

Phytoextraction of Metals from Contaminated and Mineralized Soils Using Hyperaccumulator Plants . . . . .	27
Rufus Chaney	

Phytoextraction: Commercial Considerations . . . . .	29
Michael Blaylock	

Zinc Hyperaccumulation in Plants: The Case of Zinc Hyperaccumulation in <i>T. Caerulescens</i> . . . . .	30
Mitch Lasat	

Speaker Panel and Audience Discussion . . . . .	31
---	----

#### Session V: Simulations and Forecasts

Chasing Subsurface Contaminants . . . . .	32
Joel G. Burken	

Effect of Woody Plants on Groundwater Hydrology and Contaminant Fate . . . . .	33
James Landmeyer	

Modeling Plume Capture at Argonne National Laboratory-East (ANL-E) . . . . .	35
John Quinn	

Phytoremediation Potential of a Chlorinated Solvents Plume in Central Florida . . . . .	36
Stacy Lewis Hutchinson	

Speaker Panel and Audience Discussion . . . . .	37
---	----

#### Session VI: Plume Control—On-the-Ground Experience

Phytoremediation at Aberdeen Proving Ground, Maryland: O&M, Monitoring, and Modeling . . . . .	37
Steven Hirsh	

Phytoremediation Systems Designed to Control Contaminant Migration . . . . .	39
Ari Ferro	
Deep Planting . . . . .	40
Edward Gatliff	
Transpiration: Measurements and Forecasts . . . . .	41
James Vose	
Speaker Panel and Audience Discussion . . . . .	42

#### Session VII: Vegetative Covers

Monitoring Alternative Covers . . . . .	43
Craig Benson	
Growing a Thousand-Year Landfill Cover . . . . .	44
William Jody Waugh	
Tree Covers for Containment and Leachate Recirculation . . . . .	45
Eric Aitchison	
EPA Draft Guidance on Landfill Covers . . . . .	47
Andrea McLaughlin and Ken Skahn	
Activities at an EPA Region 3 Site . . . . .	48
Donna McCartney	
Speaker Panel and Audience Discussion . . . . .	48

#### Session VIII: Degradation of Organic Compounds in Soils

Remediation of Petroleum Contaminants Using Plants . . . . .	49
M. Katherine Banks	
Phytoremediation of Explosives . . . . .	50
Phillip L. Thompson	
Case Study: Union Pacific Railroad . . . . .	52
Felix Flechas	
Phytoremediation in Alaska and Korea . . . . .	53
Charles (Mike) Reynolds	

Speaker Panel and Audience Discussion .....	54
Closing Remarks .....	55
